- Use a birth bar
- · Use a birthing stool

Perineal preservation:

- · Prefer episiotomy
- · Prefer to tear naturally
- Perineal massage
- · Warm compress

Delivery phase:

- · Choose my own position
- Position how provider prefers
- Use a mirror to see the baby crown
- Touch the head as it crowns
- · Let the epidural wear off while pushing
- · Have an extra dose of epidural
- Have pictures taken
- Avoid forceps/vacuum
- Push spontaneously
- · Push as directed
- · Push without time limits

Immediately after delivery:

- · I would like delayed cord clamping
- I plan to bank or donate cord blood
- · My partner will cut the umbilical cord
- · I will cut the umbilical cord
- I want to see the placenta
- I would like skin-to-skin before anything else

If a cesarean section is necessary or chosen:

- · CTo stay conscious
- · My partner to stay with me the entire time
- The screen lowered as baby comes out
- To push as baby comes out
- The doctor to narrate what's happening
- A quiet environment
- · A casual environment with chatting
- Music playing
- · My hands left free so I can touch the baby

Newborn procedures:

- Given only after we've bonded/during skin-to-skin
- · To include:
 - Hepatitis B vaccine
 - Vitamin K shot
 - Eye ointment
- · Do not bathe baby

Circumcision:

- Not to be performed
- Be performed with anesthesia
- · Be performed later
- Be performed without anesthesia

Avoid giving baby:

- A pacifier
- Formula

Feeding baby:

- · I plan to breastfeed only
- I plan to pump
- · Only formula
- Supplement with formula
- · Supplement with donor milk if available
- · I would like to see a lactation specialist

Key goals & notes:
